A Report on ACES session on “Experiences at Microsoft Internship Program and Deloitte Placement Experiences” conducted on on Aug 6th,2012.

(Conducted under ACES activities)

An ACES session on “Experiences at Microsoft Internship program and Deloitte placement’ were delivered by Aparna Shankar student of 4/4 CSE A ,completed her internship program at Microsoft, Hyderabad and Naman Gupta & Ruchika Jetlani students of 4/4 CSE A & B got placement at deloitte Pvt,Lmt VCE for the students of 3/4 CSE on Aug 6th,2012.

The objectives of the session was to convey strategies to be followed for cracking the internship eligibility test for Microsoft Pvt Lmt, to convey the importance of learning the application of the basic programming languages learnt so far and strategies to be followed for of effective placements preparation.

Aparna Shankar has introduced herself and followed by her experiences at internship program, what exactly she has done during her internship program.

She has acknowledged that internship program was an opportunity to test an application software and identify errors in an applications.

Aparna Shankar has expresses that internship program was informative and full of fun.Especially the Working culture at Microsoft was very motivating and full of learning. People at Microsoft are very approachable for any queries one person put before them, they extend help without any conditioning.

She also shared that students performance in internship program are purely considered to be observed as the employee of the Microsoft, India.

Naman Gupta and Ruchika Jetlani took over the session by giving their introductions and followed by the experiences right from pre placements training to final HR interview.

They have expressed that the placement training undergone by them during the summer vacation of 3/4 II-Sem has really proven to be an added advantage.

The pre placement training program has helped them in many ways like effective and viable resume preparation, quick problem solving approaches, preparation tactics for solving quantitative, analytical questions,

handling the interview smartly by being natural.

The speaker has given special emphasis on the importance of basics of programming languages like C,C++,data structures, java etc...and advised the students of 3/4 what are book suppose to be referred to crack the written test. They advised them to be good at algorithms for solving any simple problem.

They concluded the session by conveying them to code every single day as every day would prove to be day to learn new things in life.
