### **A Report on Guest Lecture Delivered by Mr. Mohammad Sakhavullah on “Cloud Computing and its Architecture” Conducted on Mar 13<sup>th</sup>, 2013**

A Guest Lecture on “**Cloud Computing and its Architecture**” was delivered by Mr. Mohammad Sakhavullah, Senior Analyst at HP, Hyderabad. The session on cloud computing was organized on Mar 13<sup>th</sup>, 2013 by CSI faculty coordinator and student members for the target student audiences of 3/4 CSE under computer society of India (CSI) at Vasavi College of Engineering.

The main objectives of the lecture were to acquaint the students audiences with the Cloud Computing and components of cloud computing.

The speaker Mr. Mohammad Sakhavullah has started the session by delivering small introduction to cloud computing and how the various services which can be rendered in form of Cloud Services.

In later part of the session speaker has discussed the Layered Architecture behind Cloud Computing and gave a special emphasis on the elements required for setting the working unit of the cloud.

Student audiences felt the session to be very informative as they got the opportunity to know the nuts and bolts of the Cloud computing. As per the speaker response the session was an interactive session with loads of enthusiasm among the student audience who came up with several doubts and queries.

The lecture concluded with a brief note by speaker to take final year project on cloud computing as this platform has a rich set of applications.
