A Report on “**Windows 8 Apps Development**” conducted on June 27th, 2013
(Conducted Under Industry Institute Interaction)

A Seminar on “**Windows 8 Apps development**” was delivered by Mr. Ram Kumar , Design Specialist, Miss. Kiran Mayee , Software Engineer, R&D at Microsoft, Edu kinect, on June 27th ,2013 for the student audiences of M. Tech (CSE).

The main objectives of seminar were

- To convey the importance of App Development for windows 8 OS.
- To convey instructions to develop Windows 8 App.

Mr. Ram Kumar started off session by narrating the evolution of App for window 8 in recent years and common uses of windows 8 & windows phony.

Followed by detailed discussion on features of Windows 8 OS, portable environment to develop the applications for Mobile, laptops & palmtops.

Windows 8 OS features include a new desktop with tiles that show the information dynamically which can be swiped or scrolled on for tablets and desktops.

The later part of the session was taken forward by Miss. Kiran Mayee on .Net Frame Work and C#, which are used to

develop windows 8 Apps. She further sparked the session by delivering following

- Cloud Service titled as “**Windows Azure**” introduced by Microsoft.
- Steps to Create Azure(database)
- Steps to establish connection between client and database.

Students were overwhelmed to witness the demonstration of a simple Windows 8 app using Visual Studio and step by step approach to develop an app for windows8.

The speakers have concluded the session by encouraging students to develop an Innovative Apps and motivated them to participate in “**YAPPON**” a competition by Microsoft which recognizes the best metro Style App.
