Department Of Computer Science & Engineering
A Seminar on "Development Of TXTWEB Application Using PHP"
(Conducted Under Alumni Activity)

An Alumni event on "How to develop the Applications using TXTWEB platform using PHP" was delivered by Mr. Murali Krishna, Mr. Santosh Kumar, Mr. Varun Garg and Mr. Sridhar Begari alumni of 2012 on Aug 14th, 2012 in the Seminar Hall, Ramanujan Block.

The objective of the seminar was to deliver the basics & steps required for development of simple TXTWEB applications followed by the process of hosting the TXTWEB applications on the web.

The session started with a brief introduction on what is the TXTWEB platform and how to deploy applications on it. They have emphasized on advantages of message based application and how it is different from developing standalone & online applications. The attractiveness of TXTWEB application is that it can be accessed using a simple SMS based service. The students were given hands on experience in developing a sample TXTWEB application and hosting it on the web.

They encouraged the students to participate in APP2Fame Developer challenge 2012 contest to showcase their skills and also compete for prizes worth of 7.2 lakhs. The students were indeed motivated to answer the questions posed to them and the alumni rewarded them with goodies for the best answers. The session concluded with a note by Mr. Murali Krishna to get registered with www.app2fame.com to get acquainted with the new technologies & also avail the opportunity of winning exciting prizes.
