## EXPERIENCE & EXPOSURE

### BILLING OF EDUCATION

The month of September turned out to be a quiet period of this semester but not for the final years. It was the most prominent time of their life. It was something they were looking forward to as an *Engineer*. People say that Education can never get on terms with billing of its own. A true saying indeed but at least a gift of it on the lines of a job is taken all in good taste. There were smiles all over the campus but anxiety and excitement were beating inside their hearts. Few were seen with the core subject textbooks of budding years of Engineering, some had pages turning of Aptitude and others were honing the talent of taming the HRMs. It was all done not for some sort of examinations but for billing of their education. Organizations were pouring in to select someone to complete projects in their companies. Rounds of interviews took place over a few days. Candidates stepped out of the panel with pulse of unique emotions in their nerves. A good count walked down back home to give their share of happiness to relatives and cherish them but few are still in the pipeline. Let's modify the original saying and state that 'There is a hope of light at the end of *pipeline* (originally its tunnel).' Companies are still there to come in so prepare with a positive attitude to crack it and Good Luck!!!!!!!

## STUDENT COLUMN

### CORRUPTION

By: Revanth, 2/4 IT

Why is it the fact that India is lagging behind in all aspects when compared to many countries which are still smaller in size, resources, population, etc?

Every question has only one answer:

**CORUPTION (Black money)**

Corruption starts from greed of making money and ends with the miseries of people.

Simple example for this is **PETROL**.

In past one year petrol rates in India have rise from Rs 50/lit to Rs 73/lit.

**WHAT MAKES THE GOVERNMENT INCREASE THE PETROL RATE SO HIGH IN SUCH A SMALL PERIOD?**

The biggest reason for this is **BLACK MONEY**.

Its a known fact that only middle class people in India pay tax regularly. Most of the high class people pay a part of it and remaining goes into their pockets. For example some XYZ needs to

pay Rs 10 tax but he pays 2 and out of his greediness he saves 8. Automatically there is a loss of 8 rupees for the government. Now the government needs to recover that money so the only way for the government is to increase the rates of the commodities like **PETROL, DIESEL, VEGETABLES (ONIONS, TOMATOES etc)**, etc.

A question to think of is Japan, the country with no **IRON ORE MINES**, how come it is the second largest producer of steel?

The answer for this is illegal exports of iron ore from **INDIA** to **JAPAN** through least cost sea ways. We have the resources but we are in a situation that we are unable to use them. Keeping the question of using it aside, we are not even able to safeguard our mines from illegal smuggling through sea ways. This is just because of corruption. Many of the government

# NOSTALGIA

officials are corrupted. They sell away what belongs to our motherland to foreign countries illegally. One of the places from where this iron ore is exported is Obulapuram mines in Karnataka which is a very big issue in the recent past, nearly 1000 tons of iron ore is exported illegally every day from Obulapuram mines but no government official bothers about it because they are corrupted.

## SCAMS SINCE 1948:

JEEP PURCHASES (1948)-80 LAKHS

BHU FUNDS (1956)-50 LAKHS

MUNDHRA SCANDAL (1957)-1.2 CRORES

TEJA LOANS (1960)-22 CRORES

KUO OIL DEAL (1976)-2.2 CRORES

HDW COMMISSIONS (1987)-20 CRORES

BOFORS PAY-OFF (1987)-65 CRORES

ST KITTS FORGERY (1989)-9.45 CRORES

AIRBUS SCANDAL (1990)-2.5 CRORES PER WEEK

SECURITIES SCAM (1992)-5000 CRORES

INDIAN BANK RIP-OFF (1992)-1300 CRORES

SUGAR IMPORT (1994)-650 CRORES

JMM BRIBES (1995)-1.2 CRORES

IN A PICKLE (1996)-10 LAKHS

FODDER (1996)-950 CRORES

CRB SCAMS (1997)-1000 CRORES

STOCK MARKET SCAM (2001)-1, 15,000 CRORES

STAMP PAPER SCAM (2003)-30,000 CRORES

SCORPENE SUBMARINE SCAM (2005)-18,978 CRORES

ALI KHAN TAX DEFAULT (2008)-50,000 CRORES

SATYAM SCAM (2008)-10,000 CRORES

2-G SPECTRUM SCAM (2008)-1, 76,000 CRORES \*\*\*\*\*LARGEST SCAM AS OF NOW\*\*\*\*\*

RICE EXPORT SCAM (2009)-2500 CRORES

ORISSA MINE SCAM (2009)-7000 CRORES

COMMON WEALTH GAMES SCAM (2010)-40,000 CRORES

# NOSTALGIA

If we look into the past from the first scam of JEEP PURCHASES of 80lakhs in 1948 to today's COMMON WEALTH GAMES

Scam of 40,000 crores the total black economy scam piles up to

Rs.910, 603,234,300,000

This would make INDIA a super power over night with no poverty and no unemployment.

If we bring back the whole black money:

NO TAX PAYMENT FOR NEXT 20 YEARS

PETROL Rs.25/lit

DIESEL Rs.15/lit

MILK Rs.8/lit

1500 UNIVERSITIES OF FOREIGN STANDARDS CAN BE OPENED

2000 HOSPITALS WITH ALL MEDICINES FREE

95 CRORE PEOPLE WILL HAVE OWN HOUSES

We all feel 'someone' needs to come to change this society but we are forgetting the fact that 'someone' needs to come from us. That 'someone' is also a human.

We feel Gandhiji, Nehru all need to make a rebirth to change and cure this society. But we are least bothered about the fact that they all are born already but are suppressed by the people around them. They are suppressed because everyone wants peace and security. They feel Gandhi needs to take a birth again but not in their house or their neighbor's house or their

colony because it may cause insecurity to them. it may cause problems to them.

All this is because of the feeling of INSECURITY OF LIFE buried in us.

For this the realization has to come from within OURSELVES. We need to safeguard our motherland. We need to abolish corruption and black money. For this we can use the print media and the telecommunication media to show the people how the tax paid by them is returning to them some other way as projects like road, IT parks, job opportunities etc.

LETS SUPPORT ANNA HAZARE TO FIGHT CORRUPTION & MAKE INDIA CORRUPTION FREE.

## OLIVEPAD – INDIA’S FIRST iPAD

By: V. Rahul

Olive Telecom is India’s leading Convergence Solutions Device Developer and is still building its name in the Indian technology market. They first brought in a series of mobile phones and then made a splash with their 3G supported X107H Zip book. Now they have announced their first Android powered tablet/ slate device in India.

While even Apple’s iPad has yet to make its official entry into India, the OlivePad is ready and able. Equipped with a 7-inch widescreen touch sensitive display (capacitive), the OlivePad is a tad heavy but smaller than the iPad. The display sports an 800 x 480 pixel resolution with 65K colors. Viewing from any angle is comfortable.

It also supports multi-touch. At 11.5 mm in depth, it’s a slim device and can slip comfortably into rear pockets.

A set of volume/zoom keys, a microSD and SIM card slots are located on the top with stereo speakers on either side. Just below the left speaker is a screen lock/ power button. A 3.5 mm hands-free socket is located at the bottom right beside the mini USB port that doubles up as a charging port. The

OlivePad is a very large Android mobile, just like the iPad is a large iPod Touch.

It comes preloaded with Android 2.1. From features to settings and navigation, the OlivePad behaves like a high-end Android phone. It offers widgets to be dropped onto multiple desktops and social networking integration with the phonebook.

It’s equipped with a Qualcomm MSM7227 chipset with a 600 MHz processor, and the UI is smooth but buggy sometimes. Thanks to the large screen, typing is comfortable, and all the goodies of the Android 2.1 engine are available.

When it comes to taking calls, you’ll need to use a hands free kit. Although the two built-in speakers are adequate for audio, the microphone’s pick-up isn’t as strong. Incidentally, the iPad also supports A2DP (Stereo Bluetooth) but it tends to drain your battery.

Through the pre-loaded app DataViz, you can create Word documents, make spreadsheets, presentations. There’s also a PDF reader. Thanks to the RSS reader, you can subscribe to RSS feeds whenever you’re online, and then read them even if you’re offline.

Standard mobile phone features like a Calendar (syncs with your Google Calendar), calculator, voice recorder, etc are also included.

# NOSTALGIA

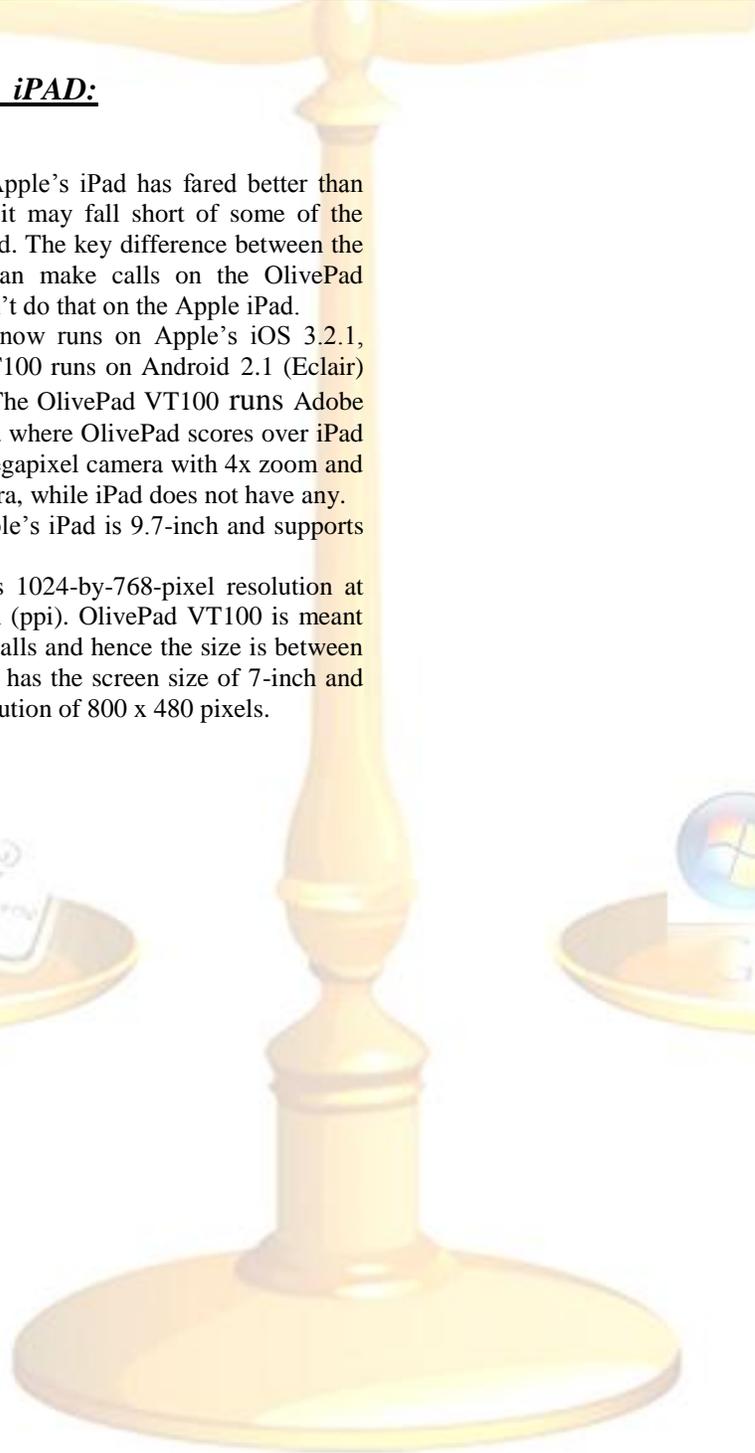

## OLIVEPAD VS iPad:

Though, Apple's iPad has fared better than most of its rivals, it may fall short of some of the features of OlivePad. The key difference between the two is that you can make calls on the OlivePad VT100 and you can't do that on the Apple iPad.

The iPad now runs on Apple's iOS 3.2.1, while OlivePad VT100 runs on Android 2.1 (Eclair) operating system. The OlivePad VT100 runs Adobe Flash. Another area where OlivePad scores over iPad is that it has a 3-megapixel camera with 4x zoom and a front facing camera, while iPad does not have any. The display of Apple's iPad is 9.7-inch and supports multi touch.

It supports 1024-by-768-pixel resolution at 132 pixels per inch (ppi). OlivePad VT100 is meant for making phone calls and hence the size is between iPhone and iPad. It has the screen size of 7-inch and has the screen resolution of 800 x 480 pixels.
