

**VASAVI COLLEGE OF ENGINEERING (AUTONOMOUS)
DEPARTMENT OF INFORMATION TECHNOLOGY**

Summary of CCA Activities 2017-18

S.No.	Name of the CCA event	Name of the Faculty-in-Charge	Detailed feedback obtained from students (to be furnished at least 100-150 words for each CCA activity)
1	Cross Word Puzzle	L.Divya and D.R.L.Prasanna	All the classes were interesting and informative. In every CCA class, we learnt something new. In the activity CROSSWORD ON C++ and DS, we were given a crossword puzzle based on the concepts of C++ and DS. It helped me to recollect the concepts. I feel, since we were given only one crossword puzzle, we were not able to recollect all the concepts. This activity would be more helpful if more such crossword puzzles are given. All the activities conducted were very useful.
2	Code Monopoly Game	J.Suneetha C.Sireesha L.Divya	Helped the students to solve programming questions with fun
3	Idea Presentation	D.R.L.Prasanna G.Meghana D.Paurul	Students explored technical innovative ideas
4	VCE Hacker Rank challenge	J.Suneetha C.Sireesha	Students participated in hacker rank challenge for 2 hours on problem solving
4	Guest Lecture on UNIX	J.Suneetha S.Rajya Lakshmi	It is informative for the students to perform well in the operating systems lab.
5	Guest Lecture on Operating Systems	J.Suneetha G.Meghana	The practical exposure of inter process communication and file system on linux benefited a lot for students.

6	Python Workshop	S.RajyaLakshmi D.Kavitha J.Suneetha G.K.Pallavi C.Sireesha	Student gain knowledge on new language like python. It is a good experience on hands on practice. Learnt a lot of things in 2 days on python work shop.
7	Poster Presentation	S.RajyaLakshmi J.Suneetha L.Divya	Poster presentation on IOT make the students to learn on new technology and presenting it exposes their innovative ideas in an efficient way.
8	Paper Presentation (A-section)	S.K.ChayaDevi S.RajyaLakshmi	CCA was useful as we were able to know about new technologies through the presentations given by our classmates. We understood how to explore research papers. It helped us to enhance presentation skills on technical topics. Because of less time for each presentation we were just introduced to the technology but didn't acquire proper knowledge on it.CCA would have been great if we could have learnt some new technologies like android, python, cloud etc. If we had done mini projects or in learnt new languages or technologies it would have been great.
9	Paper Presentation (BSection)	B.Leelavathy Ch.Swapna	With this paper presentation activity we have developed a lot presentation skills such as eye contact, style of presentation, time keeping and voice modulation such as maintaining clarity, volume and speed. Perfection in content and material. But, it took a lot of time. It is very difficult to explain IEEE papers within 10 minutes, atleast a time of 45 minutes should be given. It is better to conduct the hackathons, seminars instead of Paper presentation.
10	Awareness programme on virtual labs by IIIT Hyderabad	B.Leelavathy	Bringing awareness on virtual environment among students and faculty.
10	Quizzotic-2018	Osmania University Students	Helped the students in enhancing their general knowledge skills.
11	Being Zero- HBC 2018	C.Sireesha	Students participated in Hyderabad best coder contest in exploring coding skills.
