Brainovision Solutions Pvt. Ltd

Two Weeks Online

FACULTY DEVELOPMENT PROGRAMME

on

**AGENTIC AI**

(15<sup>th</sup> - 27<sup>th</sup> December 2025)

## About

A two weeks online FDP offering practical training in Generative and Agentic AI, enabling participants to build and deploy complete AI solutions for academic, research, and institutional needs.

## Contents

- **Generative AI Overview:** LLM basics, multimodal features, and practical applications.
- **Prompting & AI Assistants:** Effective prompting and building assistants using LangChain.
- **AI Automations & RAG:** Automation pipelines and RAG for accurate, context-aware responses.
- **Agentic & Multi-Agent Systems:** Autonomous agents and coordinated multi-agent workflows.

## Objectives

- Build core skills in Generative AI, multimodal models, LLMs, and prompting.
- Gain hands on exposure to document automation, tool calling, RAG, embeddings, and vector search.
- Learn to design autonomous agents and multi agent systems integrated with real time tools.
- Develop practical expertise in Python and API based AI engineering for end to end automation.

## Important Dates

Last Date of  
Registration

10 Dec 2025

Intimation of  
Acceptance

13Dec 2025

### Timings

6:30 pm  
to  
8:30 pm
