REPORT ON GUEST LECTURE

A guest lecture on “Applications of Remote Sensing & GIS in Flood & Cyclone Disaster Management” was conducted for B.E. IV sem Open Elective students on 11-06-2021 from 9.40 am to 10.40 am by **Dr. Shiva Prasad Sharma** Scientist/Engineer 'SF', NRSC/ISRO. For the past 14 years, sharma has been extensively working in the field of Flood/Cyclone Management and has been providing operational support during flood/cyclone seasons. The brief outline of the session is as follows.

Geographic information system (GIS) and remote sensing (RS) are very useful and effective tools in disaster management. Various disasters like earthquakes, landslides, floods, fires, tsunamis, volcanic eruptions and cyclones are natural hazards that kill lots of people and destroy property and infrastructures every year. Remotely sensed data can be used very efficiently to assess severity and impact of damage due to these disasters. In the disaster relief phase, GIS, grouped with global positioning system (GPS) is extremely useful in search and rescue operations in areas that have been devastated and where it is difficult to find one's bearings. Disaster mapping is the drawing of areas that have been through excessive natural or man-made troubles to the normal environment where there is a loss of life, property and national infrastructures. An attempt has been made to make the students understand the practical

applications of technologies like RS and GIS through the Guest Lecture.

He discussed on:

- Disaster trends
- Global Disaster Frameworks.
- Disaster Management in India.
- Applications of Remote sensing and GIS in Disaster Response, Mitigation and Management.
- Case study on Tapovan Project Site, Rishi Ganga, Uttarakhand.
- "YAAS" cyclone in Odisha state. (Application of RS & GIS)
- Hyderabad Rains in 2020
- Flood Response (Bhuvan Portal)
