COURSE OUTCOMES**At the end of the course the learners will be able to: -**

1. Solve questions in the mentioned areas using shortcuts and smart methods.
2. Understand the fundamentals concept of Aptitude skills.
3. Perform calculations with speed and accuracy.
4. Solve complex problems using basic concepts.
5. Use shortcuts with ease for effective problem solving.

UNIT 1: QUANTITATIVE APTITUDE - NUMERICAL ABILITY

- 1.1 Introduction to higher order thinking skills
- 1.2 Speed Math
- 1.3 Number systems
- 1.4 LCM & HCF

UNIT 2: QUANTITATIVE APTITUDE- ARITHMETIC ABILITY FOUNDATION

- 2.1 Ratio proportions
- 2.2 Partnership
- 2.3 Ages
- 2.4 Allegations and mixtures
- 2.5 Averages

UNIT 3: QUANTITATIVE APTITUDE- WORD PROBLEMS PART 1

- 3.1 Percentages
- 3.2 Profit and loss

UNIT 4: REASONING ABILITY- GENERAL REASONING PART 1

- 4.1 Blood Relations
- 4.2 Number Series
- 4.3 Coding and decoding

UNIT 5: QUANTITATIVE APTITUDE- WORD PROBLEMS PART 2

- 5.1 Time and Work
- 5.2 Chain Rule
- 5.3 Pipes and Cisterns

Learning Resources:

1. Quantitative Aptitude S.CHAND by Dr. R S Aggarwal
2. A Modern Approach to Verbal & Non-Verbal Reasoning S.CHAND by Dr. R S Aggarwal
3. Learn.talentsprint.com/References Courses

COURSE NAME: SKILL DEVELOPMENT COURSE- III : APTITUDE- II
 (Common to all branches) SYLLABUS FOR B.E. 2/4- IV SEMESTER

L: T: P (Hrs/Week): 1	SEE Marks: 40	Course Code: U21BS430MA
Credits: 1	CIE Marks: 30	Duration of SEE: Hours: 02

COURSE OBJECTIVES

The course will enable the learners to:

1. Students will be trained to enhance their employability skills.
2. Students will be introduced to higher order thinking and problem solving skills in the following areas - Arithmetic Ability, Numerical Ability and General Reasoning.
3. Students will be trained to work systematically with speed and accuracy while problem solving.
4. Students will be trained to apply concepts like percentages and averages to solve complex problems.
5. Students will be trained to use effective methods like elimination of options and shortcuts to solve problem accurately.

COURSE OUTCOMES

At the end of the course the learners will be able to: -

1. Solve questions in the mentioned areas using shortcuts and smart methods.
2. Understand the fundamentals concept of Aptitude skills.
3. Perform calculations with speed and accuracy.
4. Solve complex problems using basic concepts.
5. Use shortcuts with ease for effective problem solving.

UNIT 1: QUANTITATIVE APTITUDE- ARITHMETIC ABILITY ADVANCED -1

- 1.1 Time speed and distance
- 1.2 Boats and Streams
- 1.3 Problems on trains

UNIT 2: REASONING ABILITY- LOGICAL REASONING

- 2.1 Seating Arrangements- Linear; Circular; Complex
- 2.2 Venn diagrams
- 2.3 Syllogism
- 2.4 Cubes & Cuboids
- 2.5 Dices

UNIT 3: REASONING ABILITY- NON VERBAL REASONING

- 3.1 Figure Series
- 3.2 Directions
- 3.3 Clocks
- 3.4 Calendars

UNIT 4: QUANTITATIVE APTITUDE- ARITHMETIC ABILITY ADVANCED -2

- 4.1 Mensuration Part -1
- 4.2 Mensuration Part -2
- 4.3 Logarithms

UNIT 5: QUANTITATIVE APTITUDE- ENGINEERING MATHEMATICS

- 5.1 Permutations and combinations
- 5.2 Probability

DEPARTMENT OF HUMANITIES & SOCIAL SCIENCES**Skill Development Course - IV - Verbal Aptitude
SYLLABUS FOR BE 3/6 - SECOND SEMESTER (VI Semester)**

L:T: P (Hrs./Week) : 2	SEE Marks: 40	Course Code: U20BS430EH
Credits:1	CIE Marks: 30	Duration of SEE: Hours : 2

COURSE OBJECTIVES**The course will enable the learners to:**

1. Introduce students to higher order thinking and problem solving via vocabulary and its various components
2. Train students to understand context & theme and use it to complete sentences.
3. Train students to identify the structure of sentences & paragraphs
4. Train students to analyze text, e.g., simple outlining and note taking, summarize, draw conclusions, and apply information to personal experiences
5. Train students to improve the quality of sentences by fixing errors

COURSE OUTCOMES**At the end of the course the learners will be able to: -**

1. Use vocabulary as a tool to solve questions in verbal ability
2. Identify meanings of words using theme and context
3. Solve questions based on jumbles- sentences and paragraphs
4. Develop skills to critically analyze texts and then the ability to identify its theme
5. Improve the quality of their writing by being aware of the common errors

Unit 1: Vocabulary- Reading for Content and Context**Overview:**

This course is designed for students to not just understand the importance of vocabulary but also to build on it by using the appropriate tools and methods. After which they will be able to solve vocabulary based questions and also use vocabulary as a tool to solve problems.

- 1.1 Concepts & Context Rules: Collocations & Phrasal Verbs

Yoga is an internationally accepted recreational activity proven to deliver multiple health benefits. Yoga is a combination of meditation, breathing techniques, and physical movement. **21st June** of every year is celebrated as International Yoga day and activities promoting Yoga are held in institutions across the country.

The International Yoga Day will be organized and celebrated from **15th June 2023 to 21st June 2023** by the **NSS Unit** of Vasavi College of Engineering with the theme for the year 2023 'Yoga for Vasudhaiva Kutumbakam'.

Action Plan of International Yoga Day Programme:

- Yoga Practice sessions from 15th June 2023 to 21st June 2023 from 3.20 to 4.20 p.m at Ground floor Dr. Vikaram Sarabai Block.
- Yoga Poster Making Competition.
- IDY Quiz Competition : <http://quiz.mygov.in/quiz/international-day-of-yoga-2023-quiz-2-0/>
- Mass Yoga Demonstration and Practice on **21st June 2023 from 10.30 a.m to 11.30 a.m at Ground floor Dr. Vikaram Sarabai Block.**
- Yoga pledge on **21st June 2023 from 11.40 a.m at Ground floor Dr. Vikaram Sarabai Block**
<http://pledge.mygov.in/integrate-yoga-lifestyle/>

All the HODs/Functional Heads are requested instruct the students to actively participate in the above programme.

And also send 4 students two boys and two girls from each section of B.E I and II year, and also permit the available teaching/non-teaching staff members to participate and practice yoga.

Report on 2 Days Workshop on React Node JS and MongoDB

To get an hands-on experience on React Node Js and MongoDB, two days workshop was conducted under the banner of CSI Professional Body on 03-04-2023 and 4-04-2023 for VI semester students.

Speaker: Mr Krushi Raj Tula

No of student attended: 168

Faculty participation: Dr. B. Kezia Rani, M. Satya Devi, S. Renuka, Mr. Purushotham Reddy, Mr. P. Komal Reddy.

Venue: QEEE Hall, JC Bose Block, VCE.

The Workshop started with heartily welcoming the guest Mr. Krushi Raj Tula.

Faculty I/C

Day 1:

The workshop started with the introduction of Js with some questions as assignment which should be done by the students, after continued with basic programming using react and ended with how to use MongoDB.

Day 2:

On Day 2 (04-04-2023) we have done a hands-on live project where we try to replicate Todo website in which we can access our daily routines and update them. We have done this project using what we have learned in day 1.

As per the feedback received from the participants, it was a very good learning experience, the lecture helped them in building the project.

Note submitted to the Principal:

Sub: Request for permission to organize a National Level HACKATHON – Reg.

We are planning to organize National Level Hackathon "Tech - Savishkaar" with the support of ACM Hyderabad Deccan Chapter & IEEE. The objective of this National level Hackathon is to encourage healthy competition and giving students an insight as to where they stand. It is a good platform for students to learn, build and create applications by using technology. This Hackathon is open for students across India who is pursuing either BE/B.Tech/ME/M.Tech (all specializations). The program is spread over a period of 4 weeks across different phases of the hackathon and the participants are expected to be available to work on the challenge with their teams during this duration as and when they progress through each phase. This is a team based event and allows participation of three per team.

The challenge will be held in three phases.

Phase-1: All participants will be required to participate in the Online Coding Challenge. This is a coding challenge that will assess participants online in the areas of coding/puzzles. Online Coding Challenge would be for a duration of 3 hours. The results for phase-1 and the groups advancing to the next round will be announced on 14.02.2023.

Phase-2: During phase-2 each team should submit and present an idea of their problem statement in the following themes.

- Agriculture
- Health
- Smart Education
- Renewable Energy
- Student Innovation

Phase-3: During the final phase they will build IT solutions and present the same on the final day of the contest.

The details of the program are as follows.

Details	Event	Duration	Date
Phase-1	Online Coding Challenge	3 hours	12.02.2023
Phase-2	Online - Idea Presentation	20 min	27.02.2023
Phase-3	Offline - Build and Present Application	24 hours	18.03.2023 & 19.03.2023

We request you to grant permission and sanction an amount of Rs. 2,50,000/- to conduct the above National Level Hackathon.

We are enclosing the budget estimation for approval.

REPORT ON TECH SAVISHKAAR

Tech Savishkaar is a national level hackathon that gives students an opportunity to address the most serious issues we confront on a daily basis, fostering a culture of product innovation and a problem-solving mindset in the process. The objective of this hackathon is to encourage healthy competition and giving students an insight as to where they stand. It is a good platform for students to learn, build and create applications by using technology. This Hackathon is open for students across India who are pursuing either BE/B.Tech/ME/M.Tech (all specializations). The program is spread over a period of 4 weeks across different phases of the hackathon and the participants are expected to be available to work on the challenge with their teams during this duration as and when they progress through each phase. This is a team based event and allows participation of five per team.

The Department of Information Technology from Vasavi College of Engineering, Hyderabad, in partnership with ACM Chapter (Hyderabad Deccan), CSI (Region 5), CCC, IEEE (CIS/GRSS Vasavi Student Chapter), SWAYAM and DSAC IT conducted the hackathon.

Judging process

Initially the participants were explained about the three rounds to be conducted and were also briefed about the evaluation guidelines. We invited 3 judges for evaluating the hackathon from various industries. The judges evaluated the solutions based on the following parameters.

➤ **Evaluation Parameters:**

- Novelty of the Idea
- Complexity
- Clarity
- Feasibility
- Practicability
- Scale of impact
- User Experience
- Potential for future work progression
- Prescribed PPT format

➤ **Evaluation Phases:**

Round 1: Each team is supposed to give a PowerPoint presentation to the jury. The presentation included idea/approach details, use case diagram, dependencies, and showstoppers. After the presentation of each team the jury members asked questions and gave valuable suggestions to each team.

Round 1 Evaluation Rubrics:

Novelt y of the Idea (1-20)	Complexit y (1-10)	Clarit y (1- 15)	Feasibilit y (Theory / Implementation) (1-20)	Sustainabilit y (1-10)	Scale of Impac t (1- 10)	User Experienc e (as applicable) (1-15)	Relate d Study (1-10)	Total (110)
---	-----------------------	------------------------	---	---------------------------	--------------------------------------	--	--------------------------------	--------------------

Round 2: All the teams were given inputs and implementation guidelines by the jury. The teams were given time to prepare a prototype and get ready to show the implementation. Evaluation rubrics of round 2 were same as round 1 that includes some progress in their work.

Round 3: The final presentation along with prototype description and implementation was presented to the jury.

Round 3: Evaluation Rubrics

Final Presentation (1-20)	Prototype (1-20)	Total (40)
---------------------------------	---------------------	------------

After the evaluation of all teams in 3 rounds based on the evaluation rubrics the jury panel announced a total 16 teams with prizes as 1st, 2nd and consolation prize for every theme. Jury panel appreciated and got impressed with the level of engagement and collaboration between the students and staff. They noted that the students seem to be very motivated and are working hard to come up with innovative ideas.

Guest Lecture on Introduction to RPA and UI Path Architecture

To be on par with this rapidly changing technology, a guest lecture was organized under the banner of CSI Professional Body on 17-02-2023 from 10:40 to 2:20pm for VI semester students.

Speaker: Were Syed Pasha, Gunasekhar Kotla and Pathrudu Chintakayala

No of student attended: 168

Faculty participation: Dr.B.Kezia Rani, Dr.N.Anil Kumar, Mr.Manoj Patil, Mr. Purushotham Reddy, Mr.Venumadhavacharyulu.

Venue: QEEE Hall, JC Bose Block, VCE.

The session started with heartily welcoming the guests were Syed Pasha, Gunasekhar Kotla and Pathrudu Chintakayala

The session was very interactive, and students participated enthusiastically. Mr. Syed Pasha briefly explained what RPA is and how UI Path Architecture works.

Then we had a hands-on session where we worked with UI Path and built a small project which displays the Temperature of the place requested by the user.

As per the feedback received from the participants, it was a very good learning experience, the lecture helped them in building the foundation for RPA and how UI Path facilitates in achieving RPA.

Hands on session on Big Data & Data Science using Python

To be on par with this rapidly changing technology, a guest lecture was organized under the banner of CSI Professional Body on 10-02-2023 for VI semester students.

Speaker: Mr Amit Kumar Gupta, Adjunct Faculty & Sr. Data Scientist, CSEO, Microsoft India

No of student attended: 168

The session started with heartily welcoming Mr. Amit Kumar Gupta who is adjunct faculty, Sr data scientist at Microsoft.

The session was very interactive, and students participated enthusiastically. Mr. Amit briefly explained what Big Data is, interacting with students continuously to perfectly explain the content.

cloud computing was introduced and a video on how Microsoft stores its data in large data centers around the world,. Then students were given login accounts in Microsoft Azure and taught how to create virtual machines in Azure environment.

As per the feedback received from the participants, it was a very good learning experience, the Hands on session on Big Data & Data Science using Python helped them in building the foundation for Big Data, Cloud computing, and Data Analytics

Guest Lecture on Introduction to Big Data & Data Science

To be on par with this rapidly changing technology, a guest lecture was organized under the banner of CSI Professional Body on 09-02-2023 from 2:20 to 4:20pm for VI semester students.

Speaker: Mr Amit Kumar Gupta, Adjunct Faculty & Sr. Data Scientist, CSEO, Microsoft India

No of student attended: 168

Faculty participation: Dr.B.Kezia Rani, Dr.N.Anil Kumar, Mr.Manoj Patil, Mr. Purushotham Reddy, Mr.Venumadhavacharyulu.

Venue: QEEE Hall, JC Bose Block, VCE.

The session started with heartily welcoming Mr.Amit Kumar Gupta who is adjunct faculty, Sr data scientist at Microsoft.

Faculty I/C

The session was very interactive, and students participated enthusiastically. Mr. Amit briefly explained what Big Data is, interacting with students continuously to perfectly explain the content.

Then cloud computing was introduced and a video on how Microsoft stores its data in large data centers around the world, and how cloud computing actually works was shown followed by Need of Data Analytics, its types along with real-time examples were explained.

As per the feedback received from the participants, it was a very good learning experience, the lecture helped them in building the foundation for Big Data, Cloud computing, and Data Analytics

A Report on a Guest lecture on "Challenging problems and alternative solutions " for

B.E IV Semester and BE II Semester Students

A guest lecture on "Challenging problems and alternative solutions" was delivered by Prof.Suresh Chandra Satapathy on 25th June,2022 for the students of B.E IV Semester and BE II Semester.

The The following were the key points discussed during the session:

- 1)Types of problems
- 2)Why are some problems difficult to solve
- 3)Differences between ill-posed and well-posed problems.
- 4)The methods appropriate for ill-posed problems.

Firstly, Prof. Suresh Chandra Satapathy had discussed about why are some problems difficult to solve. It is because real world problems are Mathematically intractable, Transcomputationally larger search spaces, Time varying, noisy observations and competitors.

Further, explained about the type of problems. He said that all courses in engineering is about problem solving. It's main aim is to present techniques to solve hard problems.

Then he told about the differences between well posed and ill posed problems. For well-posed problems, there is an abstract model which describes the problem. Consequently, there is a solving

method. Ill-posed problems cannot be easily formalized. There are only some examples for which result is known.

Lastly, he discussed about the methods appropriate for ill-posed problems. They should be characterized by

- Ability to extract models from examples (learning)
- Ability to deal with dynamic environments (adaptability)
- Ability to deal with noisy, incomplete or inconsistent (robustness)
- Ability to provide the answer in a reasonable amount (efficiency).

The field dealing with such kind of methods is called soft computing.

Prof Suresh Chandra Satapathy concluded the session by giving the summary and he addressed the students after the session who had doubts regarding the subject.

A report on Guest Lecture

Date: 21st June, 2023
Speaker: Dr. Digambar Pawar, Associate Professor, School of Computer and Information Sciences, University of Hyderabad.
Target Audience: B.E.(CSE). 4th semester Students

Summary of Presentation

The normalization in Database Design for a given application plays a vital role in efficient utilization of storage space and fast and correct accessing of the required data. Therefore, when you work in software industry, you should avoid poor normalization in database design because of the following reasons.

Poor normalization in database design can have several negative effects on an application in the software industry. Here are some of the key impacts:

1. **Data Redundancy:** Poor normalization leads to data redundancy, where the same data is stored in multiple places within the database. This redundancy can result in inconsistencies and anomalies, making it difficult to maintain data integrity and accuracy. Redundancy also increases the storage space required and slows down data retrieval and modification operations.
2. **Update Anomalies:** Poor normalization can introduce update anomalies, which occur when modifying data in one place leads to inconsistencies or errors in other parts of the database. For example, if customer information is duplicated across multiple tables, updating the address of a customer in one table but not in others can result in inconsistent data.

3. **Insertion and Deletion Anomalies:** Similar to update anomalies, poor normalization can cause insertion and deletion anomalies. Insertion anomalies occur when it is not possible to add certain data to the database without including unrelated data. Deletion anomalies happen when removing a piece of data unintentionally removes other necessary data.
4. **Data Inconsistency:** In a poorly normalized database, data inconsistencies can arise due to redundant and duplicate data. Inconsistencies make it challenging to ensure the accuracy and reliability of data. It becomes difficult to maintain data integrity and enforce business rules across the application.
5. **Performance Issues:** Poor normalization can adversely impact the performance of database operations. Redundant data requires more storage space and additional resources to update, insert, or delete data. Moreover, complex queries might be necessary to retrieve information from multiple tables, resulting in slower query execution times.
6. **Difficulty in Maintenance and Evolution:** Poor normalization can make the database schema overly complex and difficult to understand. This complexity leads to challenges in maintaining and evolving the application over time. Modifying the database structure becomes cumbersome, and introducing new features or fixing issues becomes more time-consuming and error-prone.
7. **Increased Development Effort:** Developers working with a poorly normalized database face additional challenges in writing efficient queries, implementing data validation rules, and handling data inconsistencies. These tasks require more effort and can lead to a higher probability of introducing errors during application development.

To mitigate these issues, following good database normalization principles, such as the normalization forms (e.g., first, second, and third normal form), can help ensure a well-designed and efficient database schema.

Guest Lecture Report: NP-Hard and NP-Complete Problems

Date: 10/06/2023

Venue: VS-002

Guest Speaker: Dr. M.V. Panduranga Rao, Professor, IIT Hyderabad

Introduction: On [Insert Date], the [Insert Department/Institute] hosted a guest lecture by Professor Panduranga Rao, a distinguished academic from the Indian Institute of Technology Hyderabad (IITH). The lecture delved into the intricate concepts of NP-Hard and NP-Complete problems, shedding light on their significance in the realm of computational complexity theory.

Speaker Background: Professor Panduranga Rao is renowned for his expertise in algorithms and computational complexity. With an extensive academic background and research contributions, he is a respected authority in the field.

Key Topics Covered:

- 1. Introduction to Computational Complexity:**
 - Prof. Rao initiated the lecture by providing a brief overview of computational complexity theory, emphasizing the importance of understanding the inherent difficulty of computational problems.
- 2. P vs NP Problem:**
 - The lecture explored the famous P vs NP problem, elucidating the distinction between problems that can be efficiently solved (in polynomial time, P) and those for which solutions can be efficiently verified (in non-deterministic polynomial time, NP).
- 3. Definition of NP-Hard and NP-Complete:**
 - Prof. Rao meticulously defined NP-Hard problems as at least as hard as the hardest problems in NP, and NP-Complete problems as a subset of NP-Hard problems with a special property.
- 4. Reduction Techniques:**
 - The speaker introduced various reduction techniques, illustrating how problems in NP can be transformed into NP-Hard problems. This showcased the interconnectedness of different problems in computational complexity.
- 5. Examples and Illustrations:**
 - Through well-crafted examples, Prof. Rao elucidated specific problems that fall into the NP-Hard and NP-Complete categories. Real-world scenarios were presented to demonstrate the practical implications of these complexities.
- 6. Implications for Computer Science:**
 - The lecture underscored the profound implications of NP-Hard and NP-Complete problems in computer science, particularly in algorithm design, optimization, and cryptography.

7. Research Frontiers:

- Prof. Rao concluded by highlighting current research frontiers in the domain, encouraging students to explore open problems and contribute to advancements in understanding computational complexity.

Student Interaction: The lecture encouraged active participation, with students and faculty posing insightful questions. Prof. Rao's responses further clarified intricate concepts and fostered a dynamic exchange of ideas.

Conclusion: In conclusion, Prof. Panduranga Rao's guest lecture provided a comprehensive and accessible exploration of NP-Hard and NP-Complete problems. The insightful content, coupled with engaging discussions, made the lecture a valuable learning experience for everyone in attendance.

A Report on career guidance session Career Opportunities Overseas after Graduation on 02-03-2023

A session on career guidance was delivered by Mr. Kamal from Y - Axis Academy on 02-03-2023 to help students know about the different career paths available for them after their graduation. Prof. Kishore, Training & Placement officer introduced the speaker.

The session started with the introduction of the speaker. Studying abroad can help build career and open-up multiple possibilities. Employers increasingly prioritize graduates who have foreign experience and education in today's globalized society. Learning new languages, appreciating other cultures, overcoming the hardships of living in another country, and gaining a better understanding of the globe are all benefits that he/she will gain when you decide to study abroad. All these qualities are sought by organizations when hiring, and they will only grow more significant in the future. Studying abroad opens the door to better employment chances by enhancing knowledge, broadening experience, and developing a diverse set of talents that are highly valued around the world.

Later the speaker introduced the pattern of GRE/TOEFL exam. Then he started to explain benefits of taking these exams after third year . He also explained about job opportunities in different countries. He spoke about the importance of Statement of Purpose(SOP), and told that it should include your background, reasons for pursuing your program at the specified university, and career ambitions. Spend a lot of time on the SOP because it will help application stand out among the thousands of others. Told to take the help of an overseas education consultant to complete this requirement.

He answered all the queries posed by students on both MS and MBA programs abroad.

A Report on career guidance session Career Opportunities after BE through GATE on 28-02-2023

A session on career guidance was delivered by Mr. Ramesh Masuna from ACE Engineering Academy on 28-02-2023 to help students know about the different career paths available for them after their graduation. Prof. Kishore, Training & Placement officer introduced Mr. Ramesh.

The session started with the introduction of the speaker. It was very interactive. Then he started explaining about the different career paths available after graduation.

He asked the students whether they are interested in pursuing higher studies or going for placements. He explained about the different examinations that engineering graduates can write and also, he explained about non engineering exams available for them. He also explained about the current problem, which is being faced by the companies, which is recession. He explained the situation of next year due to recession. He motivated them to have clarity on the career goals so that they will not miss any opportunities out there. One thing is that he also mentioned MS opportunities in India.

My

Later the speaker introduced the pattern of GATE exam. Then he started to explain benefits of GATE exam once he/she qualifies. He also explained about job opportunities in PSUs. Then he mentioned the institutions (IITs) that are good for higher studies in India.

He answered all the queries posed by students. They gained a lot of information about opportunities through GATE and the session has also helped in getting a clear idea about the career paths available for them which is very helpful for their future.

To,
The Principal,
Vasavi College of Engineering.

Sir,

**Sub: Permission for organizing a Guest Lecture for B.E. VI Sem CSE and AI&ML
Students-on React- Reg.**

We would like to organize a session on "React" for B.E. VI Sem CSE A, B and AI & ML students. Praveen Kumar Purushottam, Front End Architect did his masters from University of Leicester, England will be conducting the webinar for the students. The session would focus on React components how it can be used to design front end. In this regard, we request you to allow us to organize a webinar on 17th Feb, 2023 from 01.20 AM to 02.30 PM.

A Report on "Introduction to React JS" by Praveen Kumar Purushothaman

17th February 2023

In the attempt to bridge the gap between Industry and Academia, the **CSE department** along with **ePowerTechX club**, has taken an initiative to expose students to in demand technologies. Hence, an online session on "**Introduction to React JS**" was conducted by **Praveen Kumar Purushothaman, Associate Director of Engineering at Fitch Group Inc** was conducted on **17th February, 2023 at 1:20 PM IST**. The session was attended by all sections of CSE students studying in their 3rd year in Seminar Hall and Lab VI. The session aimed to introduce React JS to the students as it is a popular front-end development framework that is widely used by companies.

Fig : Students attending the session from Lab VI of V-Block, VCE

The session started with an introduction to React JS and why it is popular among developers. The speaker also discussed the alternatives to React JS, including Angular and Vue. The speaker then went on to explain the various types of components in React, such as class components, functional components, and pure components. He also explained the Lifecycle methods of components, such as Mounting, Updating, and Unmounting.

The speaker then covered the concepts of states and props in React, which are used to manage the data and the flow of data between components. He explained the difference between the two and how they are used in React applications. The speaker then discussed the concept of controlled components, which are components that have their values controlled by React.

The speaker then explained how data flows between the states and props in a React application. He also discussed the concept of conditional rendering, which is used to display different content

based on the condition. The speaker then explained the various event handling mechanisms in React, such as onClick and onChange.

The session ended with a discussion on how to deploy a React application, including the various options available for deployment. The speaker also gave an interesting interview question, which challenged the students to use their knowledge of React to solve a problem.

Overall, the session was informative and engaging, and the speaker was able to cover a lot of ground in a short period. The students appreciated the opportunity to learn about React and how it can be used to develop modern web applications. We hope to conduct many more informative sessions like these and remain student centric in the future with the tremendous support of Dr. T Adilakshmi (Prof. and HOD CSE) , S.Vinay Kumar(Asst Prof. CSE) and the CSE Department.

A Report on career guidance session on Importance of Profile Building for Higher Education and Placements

A session on career guidance was delivered by Mr. Ajay from Career Labs on 15-02-2023 to help students know about the different career paths available for them after their graduation.

The session started with the introduction of the speaker and about his journey. It was very interactive. Then he started explaining about the different career paths available after graduation. He asked us whether we are interested in pursuing higher studies or going for placements. Meanwhile he explained about the current problem which is being faced by the companies today, which is Rescission. He explained what is going to happen in the next 1-2 years. He motivated us to have clarity on our career goals so that we will not miss any opportunities out there. He discussed some important points about higher studies abroad. He gave clarity to the set of people who are in a confusion whether to pursue higher studies or go for placements.

Later the class was divided into two sections one of which contains the set of people who are willing to go for placements and the other one for people who are willing to go for higher studies. Then Mr. Ajay handed over the session to the respective people who handled the two groups. Respective speakers explained about the current situation of the paths for which the students are willing to go for and explained about their program which is a 6 months training program where the students will be tested on various aspects which help them to perform well in their respective areas of interest. They discussed the program clearly mentioning the fee structure and asked the students to enroll in the program if they are interested.

They were very friendly and answered all our queries. We gained a lot of information which we never knew before and the session has also helped in getting a clear idea about the career paths available for us which is very helpful for our future.

REPORT ON THE GUEST LECTURE BY MR. KAMESH TALLURI

TOPIC: SOFTWARE AS A SERVICE

CLASS: CSE-A (2Y/3S)

DATE: 04/01/2023

The session dealt with topic "SOFTWARE AS SERVICE" where sir discussed examples to introduce the topic and made it clear that in the present scenario SAAS play a major role in the software industry.

We also got to know about various roles designated to the employees of a company which were also explained using present day software industries.

Sir also discussed about various types of services such as SAAS (Software as Service), PAAS (Platform as Service) etc,

We were also informed regarding different SAAS products in the field nowadays which will play major role for a fast development of the products required.

We are very much pleased to have such a session which plays a crucial role in improving our technical knowledge.
